METAL SCRAP CATALOGUE

One Company Many Solutions

RECYCLE TODAY | REUSE TOMORROW | A SUSTAINABLE FUTURE

1 ALUMINIUM SCRAP

Aluminium scrap is lightweight, corrosion resistant and highly recyclable. It is widely used in automotive, construction and packaging industries.

- Aluminium profiles & extrusions
- Sheets & plates
- Cans & beverage scrap
- Mixed aluminium (clean and sorted)

Lightweight | Highly Recyclable | Corrosion Resistant

2 STEEL SCRAP

Steel scrap is one of the most common and valuable recycled metals. It is strong, durable and essential for construction, manufacturing and infrastructure.

- HMS (Heavy Melting Steel)
- Structural steel
- Plate & sheet scrap
- Rebar & steel beams

Strong & Durable | 100% Recyclable | Essential for Infrastructure

3 BRASS SCRAP

Brass scrap is a valuable non-ferrous metal, known for its excellent machinability, corrosion resistance and aesthetic appeal.

- Brass rods & bars
- Brass sheets & plates
- Fittings & valves
- Turnings & mixed brass

Corrosion Resistant | Excellent Machinability | High Value

4 BRASS HONEY SCRAP

Brass honey is a high-grade brass scrap, typically in the form of clean, shredded or granulated material. It offers high purity and is ideal for remelting.

- Shredded brass
- Granulated brass
- Clean and sorted material
- High copper-zinc content

High Purity | Easy to Recycle | Ideal for Remelting

5 COPPER SCRAP

Copper scrap is one of the most sought-after non-ferrous metals due to its high conductivity, value and recyclability.

- Copper wire (bare & insulated)
- Copper pipes & tubes
- Copper sheets & plates
- Mixed copper scrap

High Conductivity | 100% Recyclable | High Market Value
